Find and Analyze This Year's
Stock Market Winners*

Study Stock Market Winners

Taking the time to study last year's stock market winners is a great way to learn and improve your stock analysis. By studying patterns, you'll also improve your chances of finding next year's big price gainers.

Step 1 – Find the Big Winners. Create and save a simple Delta Searches to find the Top Gainers for both stocks and ETFs. You can easily modify the criteria to suit your investment style.

Step 2 – Do the Analysis using graphs. First, start with a 2-year weekly graph using the VectorVest Simple graph layout. Make notes. Did price rise smoothly from bottom left to top right for most of the year? Was EPS rising or falling? Do the same study using a daily graph.

Second, create and save a chart using RV, RS, RT , VST and CI indicators. What were the indicators as the stock was breaking out? How did the change during the uptrend?

Lastly, use your favourite chart set-up. What was the ideal BUY POINT?

Top YTD Delta Dividend Stocks

WatchList of Voting Class Duplicates

Here is a list of Voting Class stocks that are potential duplicates with common share stocks.

I find it useful to eliminate these duplicates when I want to find top gainers for a specific time period. Once you have placed these stocks in a WatchList, it is easy to filter them out of any search as shown in the search criteria on the previous slide.
