

VectorVest Canada Online Forum

Saturday, January 2, 2016

Jamin Heller, Moderator

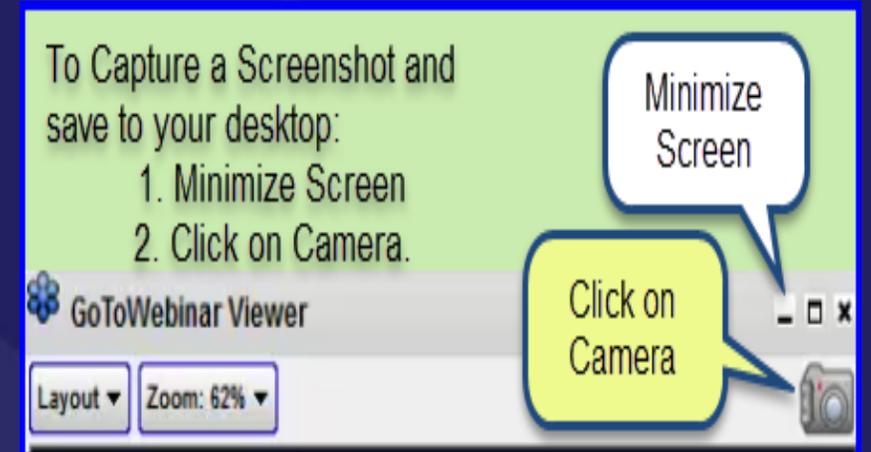

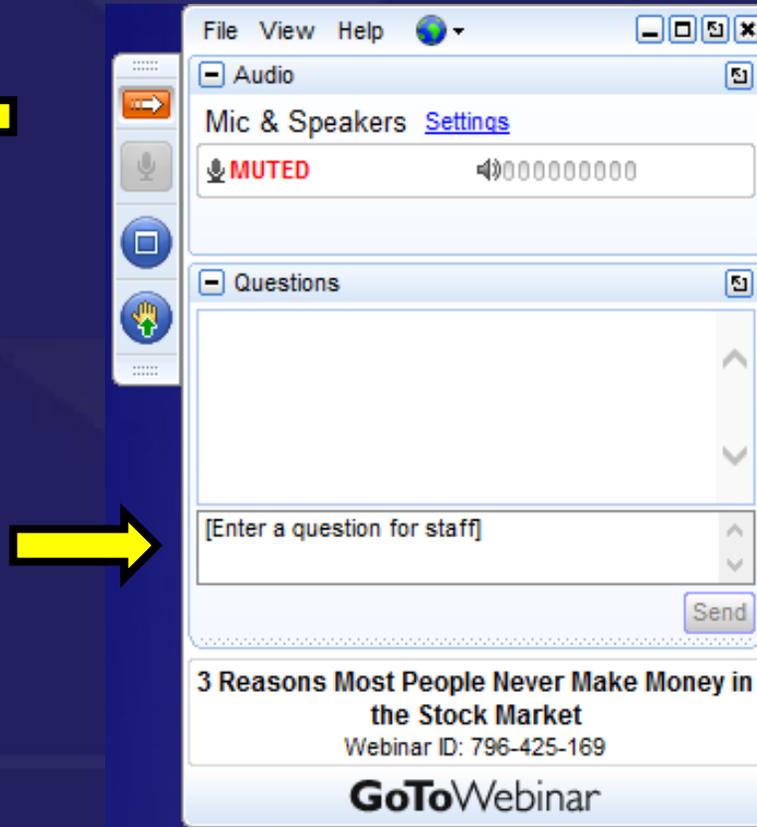

Stan Heller, Presenter

Welcome! Our meeting will start promptly at 11:00 AM ET

Questions? Comments.

Agenda

11:00 Welcome and Purpose of Meeting (5 min.)

11:05 The 7-Minute Market Forecast (20 min.)

- Market Climate for 2016
- Lessons from the Derby Jockey Club – Audrey Kelliher, Edmonton User Group

11:20 User Group News

- Meetings This Month (5 min.)
- Industry Group Analysis Report – Bob Binfet, Member, Lethbridge, AB User Group (15 min)
 - a) Bob will show how he analyzes Building (Wood Products) in a systematic routine using special VectorVest tools

11:40 *Member Presentations*** (30 min.)**

- How to Set-up and Manage Your Portfolio in 2016 – Petra Hess, Burlington User Group Leader (25 Min)
- Energy Sector Follow-up – How to Use Portfolio Manager to Get Alerts on XEG 5-MA Crossover – suggested by Geoff Small, ON Member (5 min)

12:10 Trending Stocks Spotlight (15 min.)

- Top 20 Best and Worst Performers in 2015
- The Birthday Game Review – Why RS Sort Outperforms VST Sort for long-term holds
- How to Set-up Your Trades in a Volatile Market – Lessons using Jamin Heller's Trade Analysis and Risk Management Calculator

ADJOURN – 12:30 ET

Welcome

Purpose for these monthly Forums:

- Further your knowledge of the VectorVest System.
- To share current ideas and strategies for making money and protecting wealth.
- To create opportunities to interact and share ideas with other members of our VectorVest community.
- To promote the meetings and activities of our VectorVest Canada User Groups.
- To provide a forum for VectorVest Investors who do not live near a User Group Community.

The 7-Minute Market Forecast

Review:

- **Home Page and Views - Insights and Strategy – CA and US**
- **Analysis of the Market Timing Graph**
- **Market Climate**
- **This week's Special Presentation**

Keeping On Top of the Market

1. Read The Views – US and CA
2. Listen to the Daily Color Guard Reports
3. Study the Home Page
4. Study the Derby Leaders for insights into market direction.

12/31/2015 Overview Print 

THE MARKET IN REVIEW.

Stocks headed into the last week of 2015 by clocking a loss after oil prices snapped last week's rally and began heading lower again. The Dow fell a modest 0.1% and the S&P500 and Nasdaq lost 0.2%. Crude surged Tuesday, leading the Major Indexes sharply higher. The Dow, S&P500 and Nasdaq all notched a more than 1% gain, rising 1.1%, 1.1% and 1.3%, respectively. The upside momentum was short-lived and Wall Street moved lower again mid-week as oil tumbled another 3.4%. The Dow and S&P500 dipped 0.7% and the Nasdaq slid 0.8%. The Major Indices moved further into the red Thursday during a light volume trading session with energy and commodities leading the descent. The Dow, S&P500 and Nasdaq sank another 1.0%, 0.9% and 1.2%, respectively. It was all about oil again this week and all of the Major Indexes ended in negative territory. After moving in and out of the black throughout the year, with both the Dow and S&P500 reaching numerous record highs, 2015 proved to be a tough year. The Dow closed the year with a 2.2% loss, the S&P500 with a 0.7% loss and the Nasdaq with a 5.7% gain. And That's The Market In Review.

THE YEAR AHEAD.

I concluded last year's essay on "The Year Ahead" on December 26, 2014 by saying, "Our WatchList of the S&P500 shows GRT, Forecasted Earnings Growth, is currently at 9.0%/yr., the same as last year. However, the Investment Climate Graph shows that the Earnings Trend Indicator has fallen from 1.13 to 1.11 over the last two months. This is not a serious change. Therefore, the VectorVest view is that a Bull Market Scenario will prevail in 2015. However, we must watch the Earnings Trend Indicator very carefully. Profits in the oil patch are expected to drop by 16.5% over the coming year. However, I expect profits in the consumer sectors to increase from oil's decrease. Once again, the stock market should do well in The Year Ahead."

Given that the S&P500 lost 0.73% in 2015 and the Price of the VectorVest Composite fell 4.66%, the market didn't do well. So what happened?

12/31/2015 Overview Print 

THE MARKET IN REVIEW.

Canadian shares started the holiday-shortened week in the red with Valeant leading the fall Tuesday. Falling oil prices hindered the energy sector and Canada's main index ended lower mid-week. The TSX closed lower Thursday as financial shares weighed on sentiment. Canadian shares closed lower all three trading sessions this week, to clock a loss, overall. The TSX managed to finish 2015 with an overall loss of 11.1% and the Venture lost 24.4%.

7 Global Concerns To Be Aware

1. **Oil Prices Continuing to Fall** – There are worries that new production from Iran could increase the glut.
2. **China's Shrinking Economy** – In 2015 there were many new warnings and few solutions.
3. **Emerging Market Bankruptcy** – BRIC countries and companies are struggling with debt. Brazil and Russia face disaster. India may be the only BRIC success story.
4. **Oil and Mining Melt Down** – If oil and commodities continue their plunge in 2016, low prices could eventually cause serious damage to oil producers and miners that can't be solved by layoffs and reduced spending. There are worries that the troubles of resources companies could be passed on to banks.
5. **Escalating Global Conflict** – Despite being a frightening danger with general economic concerns, escalation of conflicts could be a solution to the commodities glut. Something to watch for.
6. **Canadian Property Crash** – There are growing concerns about an overheated property market in major centres and record levels of consumer borrowing. At the same time, office vacancy rate in Calgary is running at 16%.
7. **U.S. Growth Slowing** – The U.S. steady recovery is one of the only true bright spots in the global economy. Continued growth when its currency is surging to new highs may be difficult.

**Lessons from the Jockey Club
with Audrey Kelliher , Edmonton Member
The VectorVest Jockey Club – We're Off!**

**Welcome to
the VectorVest
Jockey Club**

**Today's Host:
Steve Chappell**

**Webcast will begin at
9:00 AM ET.**

Derby Jockey Club Q&A With Audrey Kelliher

"I love the guidance we are getting from VectorVest. The presenters ask questions that make us think. If I hear them often enough, they just might stick :-))."

Q. When did you first get the Derby?

A. About one month prior to start of the Jockey Club. Listened to Todd Schaffer on a Red Hot Strategy webcast. Sideways market was not getting me anywhere and I felt I should look at the Derby tool.

Q. What has been your experience with it so far?

A. I only play the bullish trades. I find I need to watch closely and take profits based on market movement. It's been quite a ride some days. When the gates crack at the Derby, sometimes the market makes fun of the 'nag' you're riding if you aren't following the guidelines.

Q. Do you trade US or CA stocks.

A. US primarily. I've tried getting on both U.S. And Canada calls but it's found I wasn't doing justice to either side. I now play the U.S side almost exclusively as I feel there is a better opportunity and more time to look at the bigger picture with the extended hours feature. Better odds for a gain in that market.

Q. How many stocks do you typically buy? Do you cherry pick or go with the chosen strategy?

A. I buy 8-12 stocks. I usually have a mix based on what's in the top strategy and what else is flying high outside the top strategy. Going through the 'steps' with Jerry, we often set up a few WatchLists, so if the market is moving up, there's usually lots to pick from.

Jockey Club Q&A With Audrey Kelliher

Q. What Broker do you use? Can you buy a 'basket' or do you enter trades individually?

A. I use TD Webroker. I can't buy a basket so I enter trades individually at this point. It's slow and sometimes by the time my trades are entered, I should have sold. TD has a new platform but I haven't worked in it enough to be comfortable yet so I'm still on autopilot in the old platform. It looks like I'll be able to set trailing stops and buy and sell quicker with the new platform but will wait until I've had more time to look at it closely.

Q. Do you use the 5% trailing stop recommended by the Jockey Club?

A. I have and I haven't. If the market starts to fall I generally get out. That has happened a lot. My losses have occurred when I don't catch the market direction or the reason why it has changed.

Q. Do you wait until 10:00 a.m. ET to start buying as suggested?

A. The 10:00 a.m. rule seems to work best. We started the Jockey Club by buying at the open. We were in an upward trend then and that worked out. But as the market started to weaken it soon became obvious that wasn't the best answer. If I run off on my own race at the open, more often than not my speed horse turns into a nag. *Best to stick with the guidance of our experts and wait until 10:00 a.m. – it has more promise.

Q. Have you held stocks overnight?

A. I've only held stocks overnight a couple of times. I've never held the full basket as I tend to sell off stocks quickly that have a reasonable gain. If the leading industry supports a few stocks, I may hold onto them. I've had success with that strategy.

Q. Do you have any tips for members who might like to try the Jockey Club?

A. When the Jockey Club started When the Jockey Club first started, the Derby tool and daily steps seemed a bit overwhelming. Change is not something we like to do. As with anything we are learning, we have to slow down to go fast. I find I have to get methodical to get my trades in and set up my portfolio so I can be more exact about when to sell. In other words, follow the guidance and the steps. Do I leave money on the table?? Of course! But I get to take some home too.

The Jockey Club

- Exclusive to our RealTime Derby subscribers
- Newcomers may take advantage of our \$29 offer in Friday night Views (Strategy Section)
- Email invitations and reminders are sent out every morning prior to the market open
- US webcasts begin @ 9:00 AM ET each day
- CA webcasts begin @ 9:15 AM ET each day

Note: VectorVest is offering a Free 30-day Trial of the Derby to VV RealTime subscribers and a combined 30-day Trial of the Derby and VV7 RealTime subscription for \$29.00 USD. Call 1-888-658-7638

***PORTFOLIO MANAGEMENT
USING VECTORVEST***

PLAN, TRADE, MANAGE = LESS STRESS

*As a VectorVest User group leader I have had the opportunity to speak with investors that are seasoned all the way down to beginners. I am always amazed at how many are struggling and have no plan or management in place for their portfolio. I have found no other program that can help you the way that **VectorVest** can. The portfolio manager gives me all the tools I need to keep accurate control of my investments. This combined with your trading plan leads to **\$uccess.***

These are the closed trades for the portfolio. Without the Portfolio Manager the losses would have been a huge stress.

Questions To Think About

Do I stress and lose sleep over my stocks?

Do I constantly chase the “Holy Grail”?

How many ideas did I try the last 12 months?

*Does a position in the **red** scare me?*

Do I panic sell and then panic buy?

Do I actually have a plan?

*If you answered **yes** to any of these questions the*

VectorVest Portfolio Manager will help.

The Basics of a Plan

What is my desired outcome? Growth, Dividends etc.

What will my criteria be for picking stocks? Searches, WatchLists, BNN, Newsletters etc.

*How will I manage my portfolio? Entries, Exits & Stops
Market Timing, Position Size*

VectorVest can help with all of this.

*My goal for my RRSP for 2016 is to achieve a return of 5 – 8% using the Prudent Performers Search in **VectorVest** and I will change the sort to VST+YSG. The one change I will add to the search for 2016 is to exclude mining and oil stocks. This will give me strong stocks with good fundamentals and some dividend income.*

I will run the search on the first trading day of 2016. I will choose the first 10 stocks that have a VST of 1.2 or higher. I will put these in a new watch list named PHRRSP 2016. I will graph them all on my 3 EMA, 8 EMA WEEKLY graph. The stocks that have the 3 EMA over the 8 EMA will be bought on the next trading day.

*I will manage the portfolio each weekend. Any stock that has a VST below 1.2 will be sold or removed from the watch list. All stocks will be checked on the 3 and 8 EMA **WEEKLY** graph and if the 3 is below the 8 EMA they will be sold on Monday. (make sure there is air between the 3 and 8)*

Now that I have my plan in place I can build my portfolio in VectorVest

The Portfolio Manager is very easy to use with lots of great features at your finger tips

You can customize the column layout to give you information that matters to you.

The portfolio Genius will automatically manage your portfolio and let you know when your stop has been hit, execute buys and sells according to your search and settings

The screenshot displays the Genius trading software interface. At the top, it shows a green percentage of 10.97% and a green upward arrow icon. Below this, the text "Genius +AutoTimer | On" is visible, along with a "Settings..." button. The main section is titled "Activity Log (Since Last Viewed)" and shows a list of events for the date 2015-12-31. The events include "Streaming automation enabled" and several "Stop Criteria VST < 1.20 enabled" messages for various stock symbols (CCLB, GIL, SJ, XTC, NFI, DBI). At the bottom of the screenshot, a table displays portfolio data for several stocks.

%PR	RT	VS	RE	Cost / Sh	Gain / Sh	Cost Basis	Market Val	Gain

Spreadsheet created by Jamin Heller for VectorVest.

Jamin's position sizer is a great tool that will help you to see the risk you have in your positions and help CONTROL your LOSSES

There is a Tutorial Video in VectorVest University that will show you how to set up the Portfolio Manager and all of the features that are available. I encourage all of you to get your portfolio's into this program so that you feel in control at the start of this New Year.

QUESTIONS

And

FEEDBACK

*Everyone lets make 2016 a great year and support each other in our investment goals. Lets all give a **BIG THANK YOU** to our very own Canadian **VectorVest** Icon **Mr. Stan Heller**. There is no doubt that he has in some way helped everyone that is here today. This monthly forum is brilliant and we can all benefit from each others experience.*

User Group News

- Energy Sector Follow-up – How to Use Portfolio Manager to Get Alerts on XEG 5-MA Crossovers – suggested by Geoff Small, ON Member (5 min)
- Note: Please call Support at 1-888-658-7638 if you need assistance in setting up Portfolio Manager and Alerts.

User Group News

Steps to Create Alerts for XEG 5-DMA Crossover (Michael Wuetherick's Energy Digger) in Portfolio Manager: (Pro-Trader premium plug-in module is required)

1. Create a WatchList with XEG as the only entry.

2. Create the UniSearch at right:

3. Create a Portfolio in Portfolio Manager to Buy from Search every time the search returns XEG.

4. Portfolio Settings are:

- no timing

- no stop criteria

- no limit on repurchases (uncheck box)

5. In Tools tab, set alerts to be sent to your computer, email and/or phone.
